

UNC Hospital's *Opioid & Post-partum Women QI Project*

Recommended opioid prescription for post-cesarean discharge

Oxycodone Rx (5 days supply)

$$\text{Rx} = \left(\# \text{ of } \begin{array}{c} \text{Oxycodone} \\ 5 \text{ mg} \end{array} \text{ used last 24 hrs}^* \right) \times 5$$

* If \emptyset opioid tablets were used in the last 24 hours, prescribe 0-5 tablets based on shared decision-making with the patient.
